Automatic Donor Chair

Model No. : STAR -BB10

1. Provides a comfortable position for the donor. Variable positioning for either arm with a comfortably wide arm - rests.
2. Arm rests having up and down moving facility.
3. Reclining and upright body positions with a smooth shifting to any position.
4. Supporting base is completely attached with chair.
5. Drawers provided for the upkeep of equipment & consumables. In back side we already provided with Telescopic Tray.
3. If a vasovagal attack occurs the Donor's head need to be lowered immediately and his legs lifted above his heart level so that blood can flow facility should be available. For this purpose we specially provide multipurpose cushion which is use normally at back side of head but when this situation will occur that cushion can be used in down side also.
7. 4 castors are easy lockable and we given the additional stopper option in back side of castor between two castor only press it will be fixed it at floor side which is required on base.

Blood Collection Monitor

Model No. : STAR-BB11

SPACE TIME blood collection monitors (STAR-BB11) are compact instruments, to provide smooth and gentle rocking for homogeneous mixing with anticoagulant without clot formation of blood cells during collection of blood from a donor.

Technical Specification

Catalogue No.	STAR-BB11RL	STAR-BB11LCD
Readability	1 ml / 1 g.	1 ml / 1 g
Display	Red Led	LCD (With Battery Back Up)
Alarm	Audio- visual	Audio- visual
Weight	6 KG Approx	6.5 KG Approx
Size (WxDxH mm)	305x280x120	305x280x120
Input Voltage	230 V AC	230 V AC

Features

- Preset standard volume easy to change
- Provision of pausing collection and change programmed
- Volume during pause
- Micro- controller based program
- Volume can be set from 1 ml. To 600 ml
- Display of weight and volume
- Auto tare facility
- Motor activated pinching at the end of collection
- Audio- Visual alarm
- Flow rate indication

Blood Bag Tube Sealer

Model No. : STAR-BB12

SPACE TIME AND RESEARCH PVT LTD is offering an extensive range of Blood Bag Tube Sealer, which is used to seal the tube of Blood Bag containing blood without causing haemolysis, leakage of blood. These Blood Bag Tube Sealer is a compact equipment to seal the blood bag pilot tube by radio frequency sealing system. It takes less than 1.5 seconds to seal per tube but it is depend upon the tube variation. Sealed tube can be easily separated by pulling the sealing section by both sides.

SPACE TIME AND RESEARCH PVT LTD is pleased to introduce the latest Radio Frequency Sealing System.

Catalog No.	STAR-BB12
Oscillation Frequency	40.68 MHz
Radio Frequency Out put	20 W
Max sealing time	Approx 1.5
Power Voltage	AC 230 V
Power Frequency	50 Hz
Power Consumption	100 VA or less
Size (WxDxH)	17.5 x21x11cm
Weight	3.5 kg.

Blood Bank Centrifuge

Model No. : STAR-BB13

Manufacturer & Exporter of Blood Bank Centrifuge. Our product range also comprises of Blood Bank Equipment, Automatic Donor Chair and Blood Collection Monitors.

Specifications :

Model No.	STAR-BB13
Capacity	6 Blood Bag, 8 Blood Bags, 12 Blood Bags
Features	Fully Automatic
Display	Graphic LCD Display of set and process parameters
Motor Drive	Brush less induction motor VF drive
Memory	Programmable memory with tamper proof facility. Programmable Acceleration and Deceleration time range from 240 seconds to 480 seconds
Lid Lock	Safety lid lock with Indicator
Swing Bucket Blood Bag Rotor	With Metal Buckets, wind shield. Suitable adapters for 6 blood bags, 8 Blood Bags, 12 Blood Bags. Removable plastic cups to hold single/double blood bag.
Cooling unit	Kirloskar brand ISI mark compressor, is CFC free. Condenser & Cooling units are made of copper tube & aluminum finns
Temperature Range	-20 deg C to 30 deg C. LC : 1 deg C, Micro processor controlled rotor temperature within 10 deg C, regardless of the centrifuge speed.
Programmable Time	0-99 Minutes with minimum revolution of 1minute
Operation	Programmable type
Chamber	Stainless steel chamber, easy to clean, corrosion resistant with provision of both drain and condensed water outlet.

Factory: Plot no. 20, 22, I Block, Industrial Area, Hastinapur, Pin 250404 Meerut (U.P.)

Motor imbalance detection	Automatic shut down of rotor movement with unbalance indication.
Power supply	220/240 volts, 50 HZ Single Phase AC supply.
Suitability	The equipment is suitable for operation from 0 deg to 40 deg C at 90% RH. Electronic circuitry is suited for this ambient Condition. Safety: Electronic safety device incorporated that will give audiovisual Alarm in case of power failure. Voltage stabilizer with Low and High voltage protector.
RCF	Continues read out of working RPM & RCF value. Minimum limit 5000g.
RPM	Max 4200
Maximum speed	Micro processor controlled rotor speed to within 10 rpm of set value. Acceleration/deceleration profiles available.

Crayobath

Model No. : STAR-BB14

Crayo Bath is design by good quality and fine range of accessories to match the specific laboratory or process application. Outer chamber is of mild steel duly powder coated. Inner chamber is made of SS 304. Foam in placed puff insulation improves temperature stability and energy efficiency.

Features

- » Audio visual alarm if temperature deviates from preset temperature
- » Display of set value and process value
- » Temperature uniformity throughout the liquid medium
- » Rounded corners for better circulation, improved uniformity and easier cleaning
- » Long life heating elements for quick response to controller

Plasma Thawing Bath

Model No. : STAR-BB15

Micro controller based plasma Thawing Bath is a table top model, for quick thawing of plasma at 37°C. Audiovisual alarm to notify when temperature deviates from preset temperature, is fitted to the equipment. The Thawing Bath equipment displays set value & process value.

Features

- » Smooth acrylic tray for Plasma Bags
- » Integrated pump for internal circulation maintains precise temperature uniformity
- » Foamed in place PUF insulation improves temperature stability and energy efficiency
- » Outer chamber made up of MS duly powder coated
- » Inner chamber is made of SS 304

Blood Bank Refrigerator

Model No. : STAR-BB16

The Blood Bank Refrigerators are specifically designed and are suitable for research laboratories, blood bank application. The Blood Bank Refrigerator temperature up to 2°C to 6°C. These units are available in vertical and horizontal models constructed of double walls high quality powder coated exterior Mild Steel Cabinet,

The Blood Bank Refrigerators are insulated with high density CFC free poly Urethane Foam the inner chamber is made of stainless steel 304 grades. With built in micro controller based temperature indicator-cum-controller having audiovisual alarm and 7 days temperature recorder. Door locking system for improved security with magnetic door gasket, Air cooled hermetically sealed compressor.

Platelet Incubator cum Agitator

MODEL NO. STAR-BB19

This Compact Platelet Agitator Model STAR-BB19 is specifically designed to maintain donor platelets an even suspension throughout the blood plasma. Platelet Agitator agitates at the fixed speed of 70 to 80 strokes per minute. The self are pure in stainless steel (SS-304). Maximum 48 standard blood bags can be accommodated .Fixed speed of 70 to 80 strokes per minute. These all models are accommodating in platelet incubator.

Bio Freezer

Model No. : STAR-BB21

We offer complete range of microcontroller based bio freezers. The freezers are integrated with very accurate temperature control system and have large cooling capacity. These are suitable for controlled condition critical usage and are very compact and user friendly.

Specifications

Temperature: -20°C to up to -40 °C

Accuracy: ± 0.5 C.

Inner Chamber can be either in SS

Built in micro controller based temperature indicator cum controller having audiovisual alarm.
