## Seeking to be the “innovative partner” that assists you to achieve your business goals

Dear Valued Partner & Clients

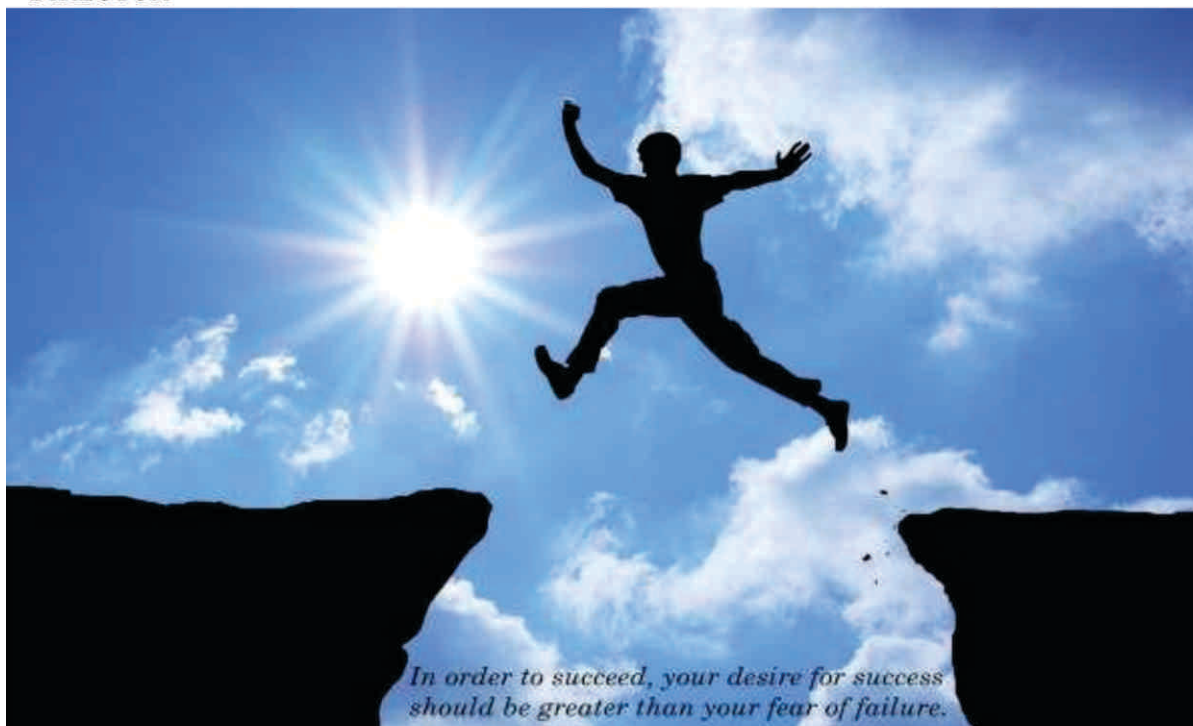

SPACE TIME has been a partner and Friend to many these past 10 years that we have been operational. When I look back to what has been the defining moment that has been instrumental in our success, it is nothing but strong partnerships built on sound relationship.

SPACE TIME AND RESEARCH PVT LTD OR SPACE TIME for short has had neady success only due to the reason that we have valued these relationships. It gives me great pleasure when we are called up time and again by our customers for their needs.

As we step into a new phase of expansion with increasing our product and service offering, I would like to take this opportunity to thank our dear customers or PARTNERS in progress that we at SPACETIME like to call it for your staunch support.

For those who are interested in PARTNERING with us, A warm welcome !!

Pramod Kumar Jingaley  
DIRECTOR

- Startup assistance

#### 2. Management, Training and Quality consulting

### Hospital Planning and Design

We assist in hospital planning and hospital design according to international standards, and contemporary design parameters. The hospital designs and drawings are reviewed based on the departments, patient flow, adequateness for other services and management ease. We bring in our vast experience to ensure that the design enhances the effectiveness and efficiency of the facility at optimal cost.

### SPACETIME has significant experience in medical equipment planning and procurement.

- Medical Equipment Planning
- Selection and procurement assistance and
- Site Preparation, Installation and commissioning
- Risk Management

### Key Indicators

- Quality Improvement
- Critical path and continuum of care guidance
- ISO readiness
- Utilization Management
- Patient Safety

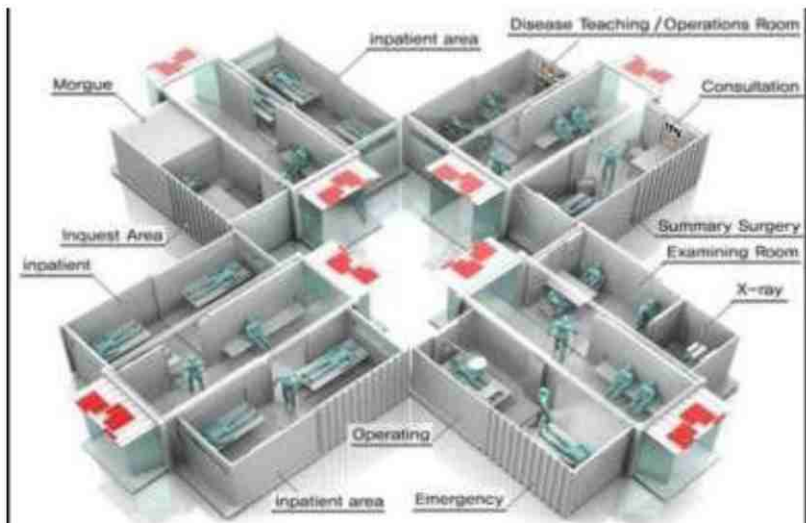

Essential hospital service required for the community can be met most economically only with adequate thought given to planning, design, construction & operation of health care facilities.

**“We design 'smart' hospitals that respond to present needs while anticipating future changes. All successful hospitals, without exception, are built on a triad of good planning, good design & construction & good administration”**

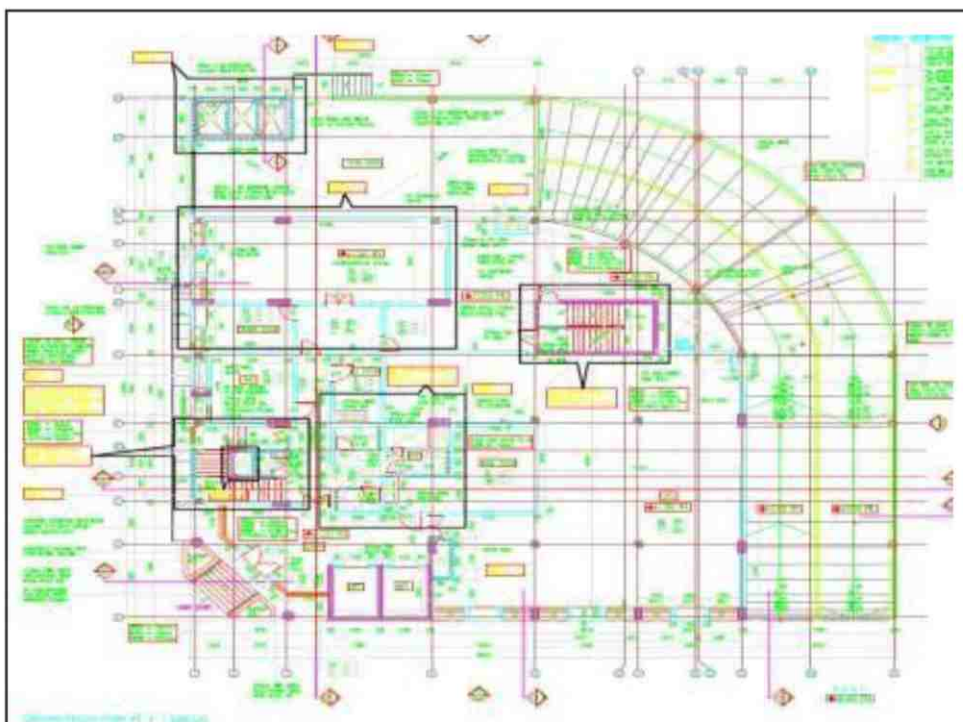

In a patient centered environment, design solutions will respond to the needs of the patients profile both architecturally and through material selections.

**The standards that we follow to :**

1. Infection control standards
2. Design concept
3. Healing environment
4. Physical environment
5. Organizational planning understanding
6. Cost analysis

**“ Hospital is a living organism, made up of many different parts, having different functions, but all these must be in due proportion & relation to each other & to the environment to produce the desired result”**
